WORLDSTAR WINNER 2019

2018 AmeriStar

SoBliss® introduces the blister packaging V2.0. No changes have been implemented around the blister concept for decades. SoBliss opens a new era in the blister world. Thanks to the vertical all-around sealing and the hinge, a puncture proof Tyvek® system has been created. Medical Devices can now be packaged in a new rigid 360° transparent double blister.

## Safe

- Single/Double/Triple sterile barrier
- Validated gamma irradiation
- Compatible ETO sterilization

## Optimized

- Various implant configurations possible
- Vertical sealed double blister with hinge

## Best Use

- Traceability improvement
- Fast opening sleeves
- Easy product identification

## Light

- Smaller than a traditionnal blister
- Shipping and storage cost saving

## Innovative

- Puncture-proof Tyvek® system
- Worldwide patented*

## Smart

- Implant stability thanks to the SoTab® /SoEasy® holders
- Single use warranty with tamper proof sleeve
- Single use tyvek band opening

## Surprising

- 360° implant visibility
- Ultra flat packaging
